

FIELD MANAGEMENT SERVICES, Inc.
123 N. Laurel Avenue • Los Angeles, CA 90048

COMPANY PROFILE:

Field Management Services is a professional engineering company, with considerable experience (20+ years) providing EMF / RF Consultant Services. FMS is headquartered in Los Angeles, with regional offices in New York, Metro DC, and Dublin, Ireland. The company offers technical and engineering support for a full range of services including full-spectrum field surveys (DC/AC/RF), source definition and field characterization, design and implementation of field management and mitigation plans, electrical systems design, new facilities design consultation, and emission source, room and area shielding.

FMS' practice is dedicated exclusively to the assessment and remediation of interference from electric and magnetic fields, in frequencies ranging from DC to 18 GHz. The company has a deserved reputation as the world leader in the application of testing and remediation technology for solving interference problems, and has successfully designed and installed shielding systems, domestically and internationally, across this entire range of frequencies. As science and medicine have developed increasingly accurate instrumentation, requiring atomic-level stability, FMS has been at the leading edge of the mitigation and construction technology that is required for these instruments to function.

Field Management Services staff of professionals includes domestic and international experts in EMF measurement, international immunity standards, shielding and mitigation, power delivery systems design and construction, power quality issues and architectural, engineering, design and construction. Additional details are available upon request and information about the company, its work and its people can be examined on the company web site: <http://www.FMS-Corp.com>
